## FORMULATED FOR IMPROVED SOLUBILITY

Multesium is an innovative formulation of magnesium and calcium. Multiple lab tests demonstrated that Multesium has 65% to 70%\* solubility due to its particle size and chemical composition, compared to competitors at 20-30%. This decreases waste significantly, while increasing macromineral efficacy.

*Multesium™ is a fine powder  
that is mixed on-farm with  
the daily feed ration.*
