INGREDIENTS

Calcium Carbonate

COLOR

Bright White

RECOMMENDED USES

- Baseball and softball infields
- Sports fields
- Multi-sport complexes
- Parks and recreation facilities
- Schools and municipalities

PRODUCT AVAILABILITY

Sold in 50 lb. bags

A reliable, easy-handling dry marker for baseball, softball, football, soccer, and other athletic fields where crisp white lines matter.

WHY CUSTOMERS CHOOSE IT

- **Bright, visible lines** - 100% white calcium carbonate delivers a clean appearance that helps boundary lines stand out on athletic fields.
- **Safer than caustic alternatives** - GLC's Athletic Field Marker is safe, naturally mined calcium carbonate, which will not cause dangerous chemical burns.
- **Easy application** - Fine, dry material is designed to flow smoothly through dry line markers for consistent striping.
- **Soil-friendly choice** - Calcium carbonate field marking products are commonly selected for athletic surfaces because they are non-caustic and gentle on soil and turf.
- **Dependable storage** - Dry athletic marking dust is valued for stable storage and ready-to-use handling throughout the season.

TYPICAL CHEMICAL ANALYSIS

Chemical Compound	% of sample
Calcium Carbonate – CaCO_3	95
Magnesium Carbonate – MgCO_3	2.65
Aluminum Oxide – Al_2O_3	0.20
Iron Oxide – Fe_2O_3	0.11
Silicon Dioxide – SiO_2	<1.0
